DETAILED ACTION

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: : In response to the final office action, dated May 14, 2008, further in view of applicant's amendments filed on 07/13/08, the application has been carefully reviewed and respectfully considered.

According to applicant's remarks based on currently amended subject matter, as discussed in page 6 through 7, applicant cancelled claims 1-11, 23-32 and 36, in which claims were rejected in previous Office action. Claims 12-22 and 33-35 are pending, wherein claims were indicated having allowable subject matter. And therefore, since the all rejected claims are cancelled, the already allowed claims [12-22 and 33-35] are maintained for the reasons given below:

With respect to claims 12-15 ('12' i.e., independent], the prior art searched and of record neither anticipates nor suggests the claimed invention. In particular, the prior art searched and of record neither anticipates nor suggests a light bar assembly supported within the scanner body, the light bar assembly comprising a drive motor, a drive wheel and a light source, the light bar assembly configured to move the drive motor and the light source together and wherein the scanner body defines an inside upper surface, and wherein the drive wheel contacts the inside upper surface of the scanner body.

With respect to claim 16-22 ('16' i.e., independent], the prior art searched and of record neither anticipates nor suggests the claimed invention. In particular, the prior art searched and of record neither anticipates nor suggests an optical scanning apparatus comprising; a scanner body; a magnet-track portion of a linear electric motor fixedly supported within the scanner body; a light bar assembly comprising a slider portion of a linear electric motor; and wherein the light bar assembly is supported in the scanner body to place the magnet-track portion in proximity to the slider portion to thereby allow the light bar assembly to be driven a on the magnet-track portion.

With respect to claim 33 (i.e., independent], the prior art searched and of record neither anticipates nor suggests the claimed invention. In particular, the prior art searched and of record neither anticipates nor suggests, a self-propelled light bar assembly supported within the scanner body, the self-propelled light bar assembly comprising a drive wheel; a platen supported by the scanner body; a drive track defined on the platen; and wherein the drive wheel is in contact with the drive track to allow the drive wheel to drive the light bar assembly along the platen.

With respect to claim 34 (i.e., independent], the prior art searched and of record neither anticipates nor suggests the claimed invention as amended. In particular, the prior art searched and of record neither anticipates nor suggests a self-propelled light bar assembly supported within the scanner body, the self-propelled light bar assembly

comprising a drive wheel; a platen supported by the scanner body, the platen defining a first edge; a drive track supported within the scanner body and positioned adjacent to the first edge of the platen; and wherein the drive wheel is in contact with the drive track to allow the drive wheel to propel the light bar assembly with respect to the scanner body.

With respect to claim 35 (i.e., independent], the prior art searched and of record neither anticipates nor suggests the claimed invention. In particular, the prior art searched and of record neither anticipates nor suggests a self-propelled light bar assembly supported within the scanner body, the self-propelled light bar assembly comprising a drive wheel; a drive track supported within the scanner body, the, and wherein: the drive wheel is in contact with the drive track to allow the drive wheel to propel the light bar assembly with respect to the scanner body; and the drive wheel includes a rubberized outer portion, and the drive track has a non-smooth surface to allow the rubberized outer portion of the drive wheel engage the drive track.

Therefore, claims 12-22, 33-35 are Allowed for the reasons the claimed invention is distinct from the prior art searched and of record.
